4. Group Discussion Room

This facility is for the benefit of the students. The students should reserve the room through the ‘Online Room Reservation’ facility which is available on the college Intranet. Students must log-in with their valid HCT username and password to access Online Room Reservation System. Two dedicated systems are available in the library for booking Group Discussion Room.

5. Interlibrary Cooperation

Our college library has tie-up with Oman’s two prominent libraries Hisn A’Shumookh Library and Sultan Qaboos University Library. They are ready to provide the required research papers and book chapters from their subscribed e-Resources. This kind of arrangement will help us to get the required information to enhance the quality of our teaching and learning.

If you need journal articles or book chapters (e-Books) from the online databases subscribed by these two libraries for your academic needs and scholarly activities, we request you to kindly submit it via ‘Ask Librarian’ form which is available online on the library webpage. The library will get the required information for you from either Sultan Qaboos University Library or Hisn A’Shumookh Library.

**Hisn A’Shumookh Library**

Hisn A’Shumookh Library (www.hsl.om and http://www.hsl.om/?lang=en) is one of the well-established libraries in Oman. The library has wide range of collections for science and technology subjects which comprises both print and electronic formats. Hisn A’Shumookh Library subscribes to major online databases for example Ebrary, Arabase, EColink, Edusearch, Medline Complete, ProQuest Central and ProQuest Dissertation.

**Sultan Qaboos University Library**

Sultan Qaboos university (www.squ.edu.om/libraries/) main library is one of the biggest libraries in Oman. It subscribes to most of well-renowned online e-Journals and e-Books databases such as ProQuest, EBSCO host, Access Medicine, ACM Digital Library, APS Physics, Web of Science, ASTM International, Engineering Village, Emerald insight, IEEE Xplore Digital Library, IEEE Computer Society, IET Digital Library, MEDLINE, Science Direct, SpringerLink E-journals, Taylor and Francis Online, ASME Digital Collection, etc. This broader coverage will certainly help us to get the required information from them.

7. How to Evaluate the Internet Resources

When we search information for our academic and research purpose on the Internet, the information received from the Internet should be evaluated because anyone can publish anything on the Internet. Opinions, misconception and inaccurate information are available plenty on the Internet. Information available on the Internet is not regulated for its quality, authenticity and accuracy.

The following factors are to be considered to assess the information available on the Internet:

1. Authorship: It is one of the major criterions to evaluate the information. The followings should be taken into consideration
   - The author is well-known in the particular field.
   - If the particular is not well-known, we have to check the author’s credibility by checking author’s position, institutional affiliation, checking the links to the author’s document from another document you trust.

2. Publishing Body: It also helps to evaluate the retrieved information.
   - Find whether it is part of an official academic or scholarly website.
   - Is the organization recognized in the particular field?
   - Ascertain the relationship of the author and the publisher. Is the retrieved information prepared as a part of the author’s professional duties or a casual or for-fee nature telling nothing about the author’s credentials within an institution?
   - Can you verify the identity of the server where the document resides?
   - Does the web page actually reside in an individual’s personal Internet account, rather than being part of an official website?

3. Referral to and/or knowledge of the literature: It refers to the content and reveals what the author knows about the particular work. It helps to evaluate the author’s knowledge in the particular area. The following criteria serve as a filter:
   - The document includes a bibliography.
   - The author refers related sources with proper attribution
   - The author displays related theories, thoughts and techniques considered appropriate to the particular work.
   - If the author is using a new theory or technique as a basis for research, he or she discusses the value and/or limitations of this new approach.
   - If the author's treatment of the subject is controversial, he or she knows and acknowledges this.
4. **Accuracy**: It is an important part of evaluation.

- The sources for factual information should be clearly listed to confirm whether the information is accurate or not. The information can be verified from other sources.
- The information should be free from grammatical, spelling and other typographical errors.

5. **Currency**: It refers to the timeliness of the information. Some information is very time sensitive. To find the currency the followings have to be checked:

- Date of creation/ publication
- Are they updating the page regularly?
- When it was revised and
- If no date is given, it can be found on the directory in which it resides

6. **Coverage**: Coverage is one of the most important factors to consider before using the information in a Web page.

We have to find whether the website addresses the particular topic clearly and adequately, and also to what extent it covers the particular topic and substantiate other relevant materials. Furthermore, the user should check the identified audiences are appropriate for your needs.
